OBJECTIVE

Motivated Computer Science and Engineering student seeking opportunities to apply programming and problem-solving skills while gaining practical experience in software development and emerging technologies.

SKILLS

Programming Languages: C++, Python, JavaScript

Web Technologies: HTML, CSS

Database: DBMS

Soft Skills: Problem-Solving, Communication, Teamwork, Adaptability

PROJECTS

Smart Irrigation System Using Soil Sensor

2026

- Developed a smart irrigation system using a soil moisture sensor to monitor soil moisture levels and determine when irrigation is required.
- Worked on the project as part of Electronics and Communication Engineering (ECE) coursework, applying sensor-based monitoring and automation concepts.
- Designed the system with the goal of reducing unnecessary water usage by providing irrigation according to soil moisture conditions.

Cybersecurity Awareness Program | Community Development Project

2026

- Conducted cybersecurity awareness sessions for school students as part of a Community Development Project (CDP).
- Explained fundamental cybersecurity concepts, online safety, responsible digital practices, password security, and common cyber threats.
- Communicated technical concepts in a simple and understandable manner to help students develop safer online habits.

CERTIFICATIONS

CS105: Introduction to Python | Saylor Academy

Feb' 26

- Completed a 36-hour Introduction to Python course covering fundamental Python programming concepts.
- Achieved a grade of 96.84% in the course.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology in Computer Science and Engineering

2025 – 2029

CGPA: 8.1 | 3rd Semester

Indira Gandhi Sr. Sec. School

Haryana

Intermediate

2025

Percentage: 66%

Shamrock School

Haryana

Matriculation

2023

Percentage: 65%
